

DR. YADRO DUCIC

CENTER FOR AESTHETIC SURGERY

COLLEYVILLE, TEXAS
FORT WORTH, TEXAS

American Board of Facial Plastic and Reconstructive Surgery

American Board of Otolaryngology / Head and Neck Surgery

WHAT INFORMATION WOULD YOU LIKE TO IMPART TO PATIENTS?

Especially when dealing with the face, it's important to see a board-certified surgeon who has a lot of experience, meaning they do a high-volume of cases concerning the specific procedure you're considering.

HOW DO YOU DETERMINE THE BEST TREATMENT COURSE FOR PATIENTS?

You have to look carefully at their individual facial anatomy and assess their needs. For example, some patients with a sagging neck can be treated with simple liposuction. However, others may require neck lifting to resuspend the tissues in a more aesthetic fashion. Training and experience serve me well in making appropriate recommendations.

HOW DO YOU DEFINE SUCCESSFUL RESULTS?

My number-one goal is to make you, the patient, happy. Additionally, the aesthetic goal is to make the features and appearance overall pleasing and youthful. I want you to look rejuvenated and refreshed but also very natural. I strive to avoid all telltale signs of surgery.

CUTTING-EDGE CARE

Using a wide array of options to treat his patients' facial aesthetic concerns, Dr. Ducic stresses matching the right technique to the right patient. "There's a tendency for some surgeons to naturally just fall into one procedure that works for them and get very comfortable, which discourages seeking improvement," Dr. Ducic says. "We don't present just one strategy. For example, with facelifts we offer endoscopic facelifts, skin lifts, mid-facelifts, deep-plane facelifts, multi-plane facelifts and more." In addition to writing more than 130 articles and book chapters, Dr. Ducic instructs future surgeons as a clinical professor to stay on the cutting edge.

BEFORE

AFTER

ENHANCING PROPORTIONS

Unhappy with her pointy nose and small chin that looked unbalanced and made her feel self-conscious, this 17-year-old patient visited Dr. Ducic in hopes of a new look and feel. "I performed a chin implant procedure, as well as an open septoplasty to enhance the shape of the patient's nose," says Dr. Ducic. "The result is beautiful and very natural looking."

"HELPING OTHERS IS MY PASSION"

WITH 15 YEARS OF EXPERIENCE TO HIS CREDIT, DR. YADRO DUCIC BELIEVES THAT FACIAL PLASTIC SURGERY SHOULD GO UNDETECTED. "IN MY OPINION, PEOPLE SHOULD NEVER KNOW YOU HAD WORK DONE," HE SAYS. "IT SHOULD BE OUR LITTLE SECRET AS TO WHY YOU LOOK SO GOOD."

WHAT IS YOUR FAVORITE PART OF YOUR JOB?

Following up with patients long-term and seeing how happy they are with their results is very exciting.

WHAT IS THE BEST ADVICE YOU'VE RECEIVED?

Treat every patient like a member of your family—with respect, appreciation and genuine concern for their well-being.

WHAT FASCINATES YOU MOST ABOUT THE HUMAN BODY?

Its capacity to heal.

HOW DO YOU GIVE BACK TO YOUNGER GENERATIONS OF SURGEONS?

I share my knowledge by contributing to publications and discussing new techniques with future surgeons. I also train residents from the University of Texas Southwestern Medical Center and am a fellowship director for the American Academy of Facial Plastic and Reconstructive Surgery. Teaching keeps me fresh and excited about what I'm doing.
