

Dr. Yadro Ducic

Aesthetic and Reconstructive
Surgery Associates

Colleyville, Texas

Fort Worth, Texas

Dallas, Texas

ASK DR. DUCIC

WHAT INFORMATION WOULD YOU LIKE TO IMPART TO PATIENTS?

Especially when dealing with the face, it's important to see a board-certified surgeon who has a lot of experience, meaning they do a high-volume of cases concerning the specific procedure you're considering.

HOW DO YOU DEFINE SUCCESSFUL RESULTS?

Our number one goal is to make the patient happy. Additionally, the aesthetic goal is to make their features and their appearance overall pleasing and youthful. We want them to look rejuvenated and refreshed but also very natural. We strive to avoid all telltale signs of surgery.

HOW DO YOU DETERMINE THE BEST TREATMENT COURSE FOR PATIENTS?

You have to look carefully at their individual facial anatomy and assess their needs. For example, some patients with a sagging neck can be treated with simple liposuction. However, others may require neck lifting to resuspend the tissues in a more aesthetic fashion. Training and experience serve me well in making appropriate recommendations.

Cutting-edge care

Using a wide array of options to treat his patients' facial aesthetic concerns, Dr. Ducic stresses matching the right technique to the right patient. To make sure he has the right tools at his disposal, he seeks new techniques and better methods. "There's a tendency for some surgeons to naturally just fall into one procedure that works for them and they get very comfortable, which discourages seeking improvement," Dr. Ducic says. "We don't present just one strategy. For example, with facelifts we offer endoscopic facelifts, skin lifts, mid-facelifts, deep-plane facelifts, multi-plane facelifts and more." In addition to researching and writing more than 130 articles and book chapters, Dr. Ducic instructs future surgeons as a clinical professor at the University of Texas Southwestern Medical Center and offers the only fellowship in North Texas through the American Academy of Facial Plastic and Reconstructive Surgery to stay on the cutting edge of facial plastic surgery.

RHINOPLASTY

HOW CAN I ENSURE NATURAL-LOOKING RHINOPLASTY RESULTS?

To achieve a natural-looking result, it's important to go to a surgeon who has experience with this procedure—and customizing it. With rhinoplasty it's difficult to go for a certain look. If you switch the noses of two attractive people with nice noses, they would probably look strange because that new shape might not match their face. That's why the procedure needs to be tailor made to create the nose that is right for each patient. It should be something that fits with your face but is not noticeable or distracting.

“helping others is my passion”

WITH 15 YEARS OF EXPERIENCE TO HIS CREDIT, DR. YADRO DUCIC BELIEVES THAT FACIAL PLASTIC SURGERY SHOULD GO UNDETECTED. “IN MY OPINION, PEOPLE SHOULD NEVER KNOW YOU HAD WORK DONE,” HE SAYS. “IT SHOULD BE OUR LITTLE SECRET AS TO WHY YOU LOOK SO GOOD.”

Laser Resurfacing

ABOUT DR. DUCIC

WHAT IS YOUR FAVORITE PART OF YOUR JOB?

Following up with patients long-term and seeing how happy they are with their results is very exciting.

WHAT IS THE BEST ADVICE YOU'VE RECEIVED?

Treat every patient like a member of your family—with respect, appreciation and genuine concern for their well-being.

WHAT FASCINATES YOU MOST ABOUT THE HUMAN BODY?

Its capacity to heal.

HOW DO YOU GIVE BACK TO YOUNGER GENERATIONS?

I share my knowledge by contributing to publications, discussing new techniques and new ways of performing procedures. I also train residents from the University of Texas Southwestern Medical Center and am a fellowship director for the American Academy of Facial Plastic and Reconstructive Surgery. I think it's important to try and pass on what I know to help future patients because one day our children are going to need these doctors. Teaching also keeps me fresh and more excited about what I'm doing.
